

HYDE PARK GLOBE

Product Features

The Hyde Park Globe is a traditional, heritage, cast gun metal globe which has clear glass glazing. The globe is fitted with an extended ogee with a highly decorative cast crown. The combination of the globe and crown set offers a unique Heritage globe.

Features

The Hyde Park Globe is available in one size and is supplied with a door for ease of maintenance. The product is post top mounted as standard and designed to fit a 76mm spigot. The balanced flue arrangement, within the globe, ensures effective draft free running.

Controls

The permanent pilot and solenoid are mounted in the main body of the lantern. If mains power is not present the optional battery powered Sugg Opto/Clock offers timed control from a remote box fitted in the column base, also available, a photocell operation from a remote location. Both control options are available within the Hyde Park Globe for both burner types, for both natural and LPG gases.

Options

Upper glazing can be etched to offer a defused upward component of the light output.

Typical Specifications

The Hyde Park Globe IP54 lantern: cast aluminium frame. **Powder coated Black Ral 9005** with **clear glass panel** glazing, complete with a **hinged door** for access and maintenance. The Hyde Park Globe measures 960mm in height, and 450mm in width. Supplied with a powder coated four point fixing spigot to fit a 76mm spigot. The Globe is fitted with a **4 light inverted mantle superheated cluster** burner with integral solenoid and permanent pilot.

Please note that items highlighted in bold can be changed using the options available.

Fishtail Burners

The fishtail burner is a flat flame that is produced from a ceramic jet which ensures that the flame is stable and provides the visual fishtail shape. This is sometimes referred to as a Batswing burner and is preferred when the flame shape and appearance is of more importance than the light output.
